Word Bank:

Embryo	Experiment	Petri dish	Medium
Yolk	Tropical	Eye	Microscope
Pipette	Fin	Chorion	Larvae

ZEBRAFISH VOCABULARY QUIZ

ANSWER KEY

1. Small plastic container we use to hold the embryos and larvae.

PETRI DISH

2. Tool that makes very small things look much bigger so we can see them better.

MICROSCOPE

3. Tool we use to clean out contaminants and dead embryos from the Petri dishes.

PIPETTE

4. An environment that is warm all year and has a lot of rain.

TROPICAL

5. What we call the baby or offspring when before it has hatched out.

EMBRYO

6. What we call the baby fish after they hatch.

LARVAE

7. A healthy environment for developing fish that contains water, oxygen and salts.

MEDIUM

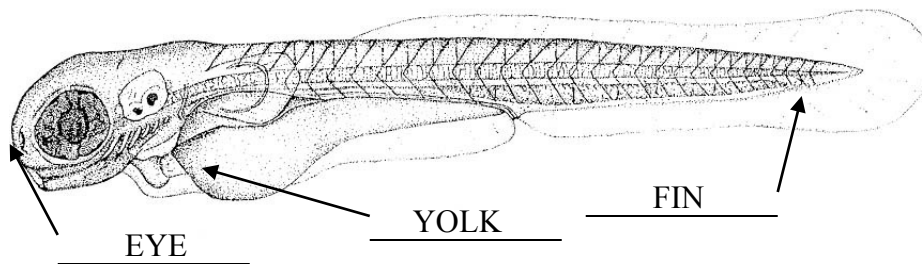

8. A test used to find out about something.

EXPERIMENT

9. The scientific word for the shell surrounding and protecting the zebrafish embryo.

CHORION

10. Label the zebrafish larva:

Word Bank:

Embryo

Experiment

Petri dish

Medium

Yolk

Tropical

Eye

Microscope

Pipette

Fin

Chorion

Larvae
