

Name \_\_\_\_\_

# WATERSHED CROSSWORD PUZZLE (LEVEL 1)

## Across

- 2 The disruption and movement of soil by wind, water, or ice
- 5 A surface or area that is hardened and does not allow water to pass through
- 6 A partially enclosed body of water where fresh water from rivers mixes with salt water from the ocean
- 7 Surrounds and protects the fish embryo

## Down

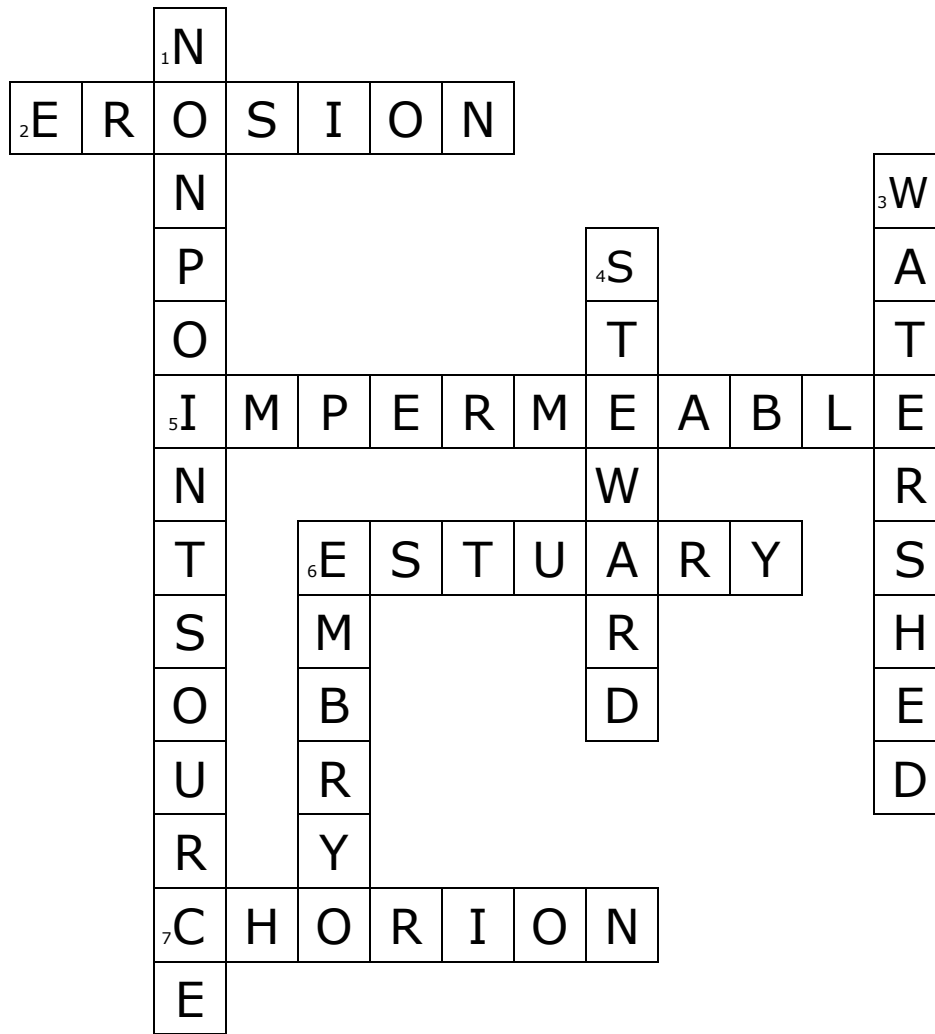

- 1 Pollution that cannot be attributed to a clearly identifiable, specific physical location
- 3 An area of land that drains into a particular river, lake, bay, or other body of water
- 4 A person who takes responsibility for protecting, restoring, and caring for a watershed
- 6 A developing organism that has not yet been born or hatched

## Word Bank

chorion	embryo	erosion	estuary
impermeable	nonpoint source	point source	watershed

## WATERSHED CROSSWORD PUZZLE (LEVEL 2)

### Across

- 3** Surrounds and protects the fish embryo  
**5** An area of land that drains into a particular river, lake, bay, or other body of water  
**7** A surface or area that is hardened and does not allow water to pass through  
**10** Where the fish embryo gets its nourishment from  
**11** The disruption and movement of soil by wind, water, or ice

### Down

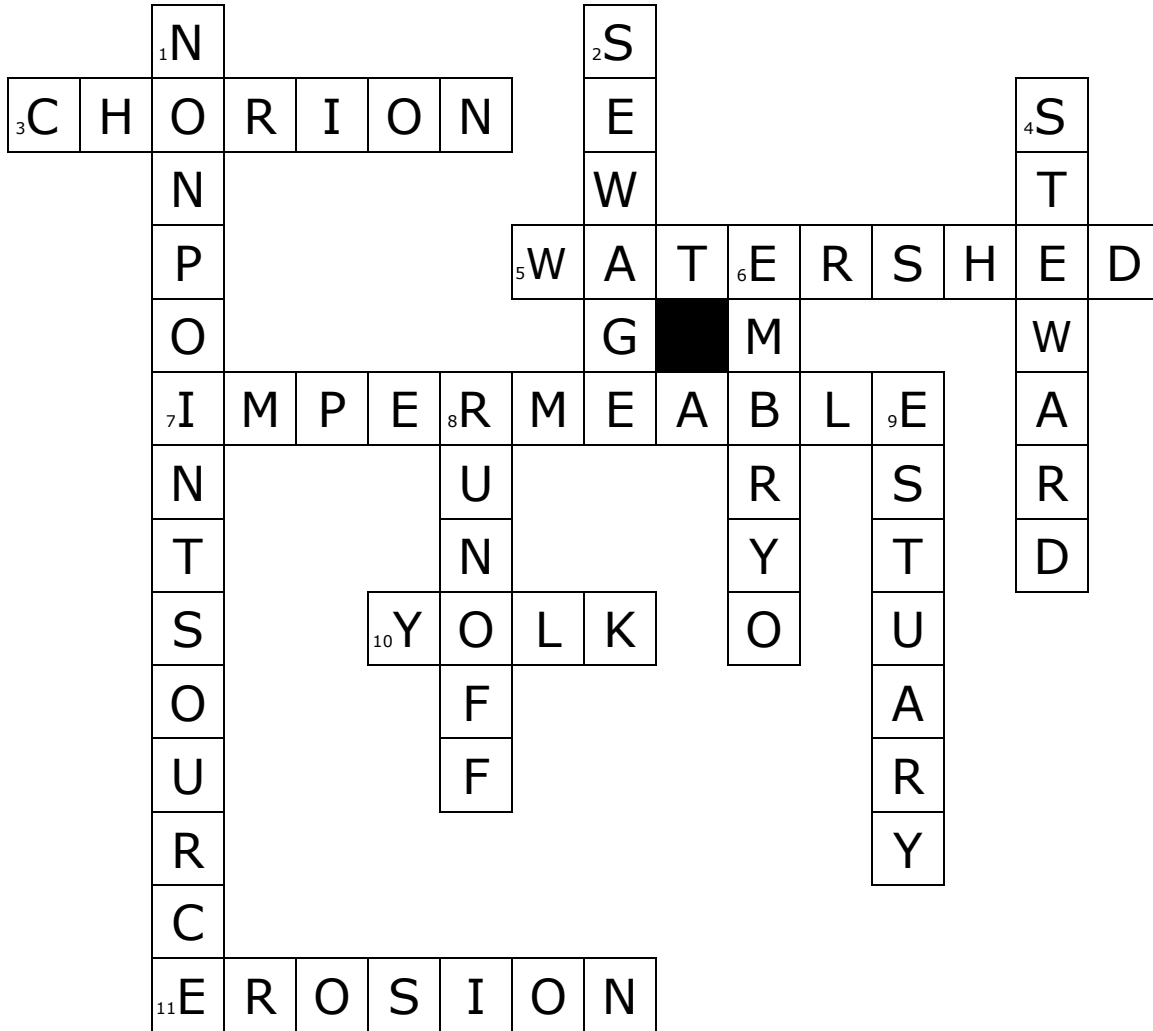

- 1** Pollution that cannot be attributed to a clearly identifiable, specific physical location  
**2** Water that has been used in homes, industries, and businesses that is not for reuse unless treated  
**4** A person who takes responsibility for protecting, restoring, and caring for a watershed  
**6** A developing organism that has not yet been born or hatched  
**8** Any precipitation in an area that does not evaporate or soak into the ground, but instead pools and travels downhill  
**9** A partially enclosed body of water where fresh water from rivers mixes with salt water from the ocean

### Word Bank

chorion	embryo	erosion	estuary	impermeable	
nonpoint source	point source	runoff	sewage	watershed	yolk

# WATERSHED CROSSWORD PUZZLE (LEVEL 3)

## Across

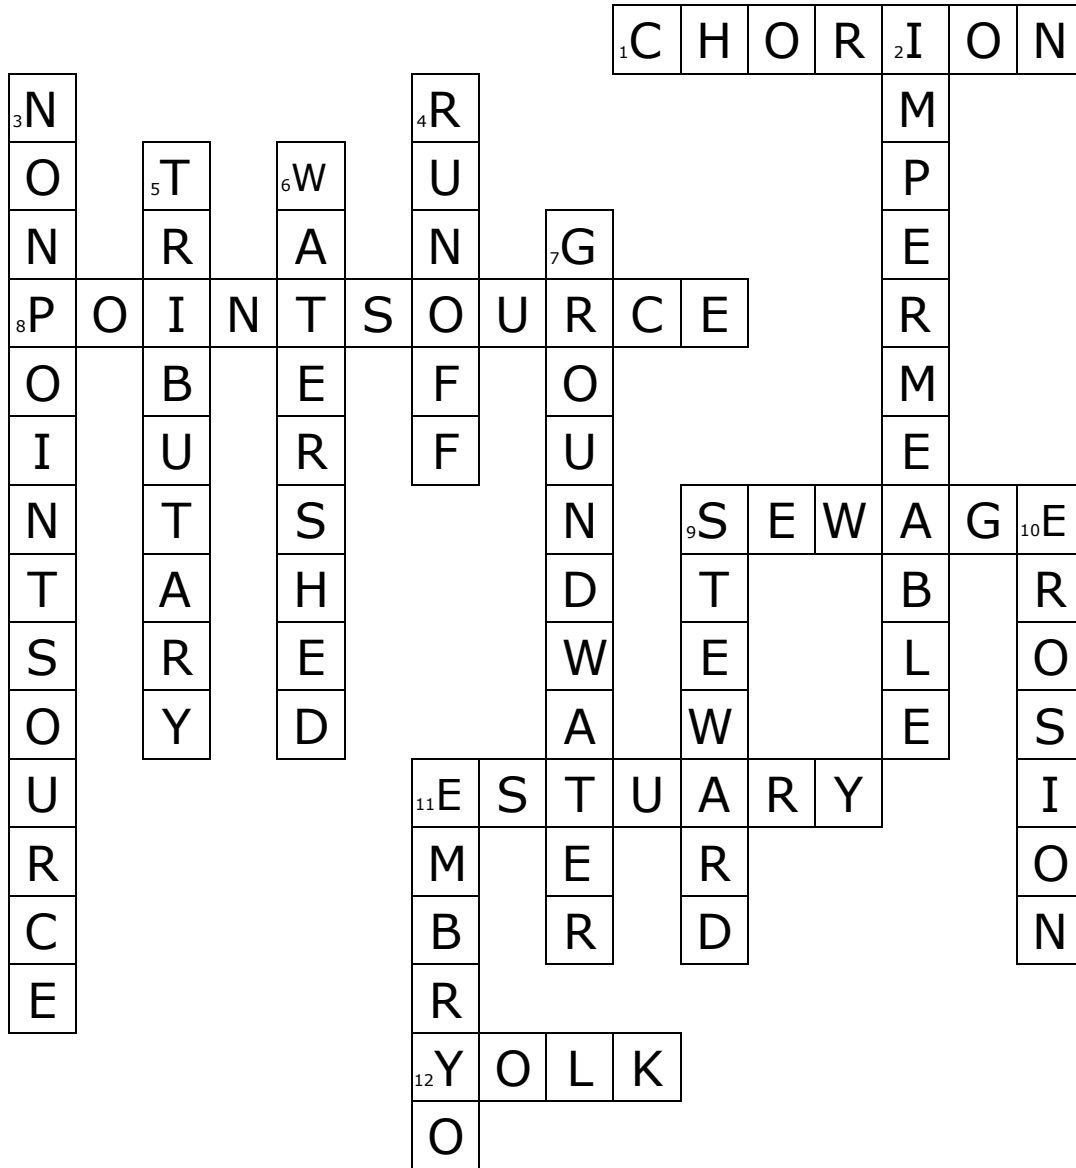

- 1 Surrounds and protects the fish embryo
- 8 Pollution that can be attributed to a specific physical location
- 9 Water that has been used in homes, industries, and businesses that is not for reuse unless treated
- 11 A partially enclosed body of water where fresh water from rivers mixes with salt water from the ocean
- 12 Where the fish embryo gets its nourishment from

## Down

- 2 A surface or area that is hardened and does not allow water to pass through
- 3 Pollution that cannot be attributed to a clearly identifiable, specific physical location
- 4 Any precipitation in an area that does not evaporate or soak into the ground, but instead pools and travels downhill
- 5 A stream or river that eventually flows into a larger water body
- 6 An area of land that drains into a particular river, lake, bay, or other body of water
- 7 Water that is stored underground in cracks and spaces in rock and soil
- 9 A person who takes responsibility for protecting, restoring, and caring for a watershed
- 10 The disruption and movement of soil by wind, water, or ice
- 11 A developing organism that has not yet been born or hatched
